**EXHIBIT A**

I acknowledge the duty to disclose information that is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, § 1.56 (reprinted below):

**§ 1.56 Duty to disclose information material to patentability.**

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
  - (i) Opposing an argument of unpatentability relied on by the Office, or
  - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

**BEFOREHAND BY E-mail**

Dear Mr. Hadzioannou,

Thank you for your quick response.

From your facsimile, dated 7 December 2003, I conclude that in the labour contract (arbeidsovereenkomst) between you and Papyron BV nothing was said about intellectual property rights. It is in this situation that the employer, here Papyron BV, is entitled to the patents. According to this situation, there are no rights left (for entitlement to the patents) for you.

Another topic is compensation for you as inventor. This topic has nothing to do with the entitlement to the patents. If there is reason to believe that you are not compensated as inventor, I think you should ask the curator of Papyron for this compensation.

I hope that things are more clear now, and that you will sign the documents. I ask you to sign the documents and to return them within one week, i.e. before 24 December 2003.

If there are any questions left, please do not hesitate to contact me.

Yours sincerely,

## Lettre recommandée avec accusé de réception

Dear Mr Ekkel :

In your letter of 01/03/04, I am surprised to see no mention of my reply by fax dated 23/12/03 in which I wrote that “since there has never been any labor contract between Papyron and myself, and I didn’t receive any salary from Papyron when the patents were filed, I cannot be considered as employee of Papyron and denied of my rights as co-inventor of the patents.”

Enclosed you will find copy of the fax.  
With reference to the second alinea of your letter of 01/03/04, I’m not only co-inventor of the patent but also co-owner since I never accepted to sell my intellectual property rights to anyone. Stork Prints B.V. made an offer to buy my rights in January 2004 but I did not accept (see enclosed copies of the e-mails exchanged between Dr. Pelssers and myself).  
Again I refuse to sell my intellectual property rights for one dollar and I won’t sign the documents you sent me for this purpose.

Sincerely yours,

G. Hadzioannou
